- *Read this article from about Taikichiro Mori and answer questions 1-6 on the opposite page.*
- ***For Questions 1-6 mark ONE letter A, B or C on your answer sheet.***

At the time of his death in 1993, Taikichiro Mori was the world's richest man. Known as Tokyo's 'Ooyasan', a friendly nickname for landlord, he was a landowner and property developer that had been able to take advantage of Japan's rapid economic expansion in the booming post-war years. His property portfolio included more than 80 buildings in the city that was, at the time, the most expensive land on earth. Worth an estimated \$13 billion, Mori was at that time twice as wealthy as the richest American, Bill Gates.

It was not until he had already retired from a thirty-year career as an economics professor that Mori began to grow his property empire, expanding on two buildings owned by his father. His first step was to begin acquiring property in the Toranomon area in downtown Tokyo where he had grown up. Toranomon was then a residential area full of narrow streets and traditional wooden buildings, but Mori realized that for Japan to compete with the West modernization was essential. 'We have to change in order to live' he said in reference to the modern high-rise city he had helped construct.

One of the keys to Mori's success was his patience and the way he carefully built relationships with the people whose property he wished to purchase. His ability to separate residents from their land was remarkable in a culture which expected land to stay within a family for generations. Mori, however, played a long game and took time to establish trust with property owners, attending their festivals and even going on holiday with them on occasion.

In spite of being the world's richest man, there were none of the usual trappings of wealth. Mori lived in a modest dwelling, abstained from drinking and smoking and came to work in a traditional kimono. In fact, he seemed uncomfortable with the attention his status as the world's richest man brought him, 'I find it a little bit odd. I've been living and working at my own pace all this time, and now I'm getting all this attention.'

However, the greatest paradox was that the soaring property prices that had helped Mori build his empire and launched him into the position of world's wealthiest man were also one of his greatest concerns. He felt that property prices had become excessive in Tokyo, 'I compare it to the foam on beer, with the beer being the actual value of the land. There is too much foam on top' he once said.
