#### MANAGING A PROJECT

Many of the problems that throw projects off schedule, or cause them to fail completely, arise simply from poor or insufficient planning. The first step to the successful planning of a project is to create a plan which includes:

- goals that are measurable
- the key 1. \_\_\_\_\_ of the project and the timing of each
- the deliverables that the project will produce and 2. \_\_\_\_\_ delivery dates
- a clear timeline for achieving 3. \_\_\_\_\_

If you underestimate the resources or time required for the project or if you fail to 4. \_\_\_\_\_ problems, there are three possible courses of action:

- renegotiate the deadline (problem: project delay)
- employ more resources (problem: cost overrun)
- reduce the 5. \_\_\_\_\_ of the project (problem: less delivered)

No matter how stressful or frustrating the planning stage may be, headaches at this stage are always preferable to the above issues that invariably result from taking short cuts.

Choose the best option for each gap.
